

Here we go :

```
Loop i = 1 to Array.length :  
    IF current element is positive :  
        update current sum  
        compare max sum with current sum  
        update max sum  
        update max ranges  
    ELSE :  
        current sum := 0  
        update current ranges.  
EndLoop;  
  
return elements of max ranges
```
